

## Chapter 3 | The Economy of Louisiana

### Item 1: Multiple Choice

Based on Source 3, which is the most valuable resource produced in Louisiana?

- C. poultry

### Item 2: Multiple Select

Based on Sources 2 and 3, which two statements are supported by the maps?

- hurricanes Katrina and Rita both hit Louisiana damaging oil refineries and offshore rigs
- the 13 oil refineries in Louisiana are located near land oil wells

### Item 3: Technology Enhanced Item

Based on Source 4 and your knowledge of social studies, identify whether each activity describes a natural, capital, or human resource.

#### Answers:

1. Human
2. Capital
3. Natural
4. Natural
5. Human
6. Capital
7. Capital
8. Natural
9. Human

### Item 4: Constructed Response

#### Answers:

The severe decline in oil production may result in its scarcity, resulting in higher oil prices. Oil is a nonrenewable resource and will eventually run out. Applying a cost/benefit analysis now to the best use of our limited oil will help make decisions that have the lowest opportunity cost in the future.

#### Scoring Notes:

Scoring Information	
Score Points	Description
3	Student's response correctly provides an explanation of the economic effects on the state using two or more economic terms from the word bank
2	Student's response correctly provides an explanation of the economic effects on the state using one economic term from the word bank
1	Student's response correctly provides a general statement of the economic effects on the state
0	No student response or inaccurate response
